Dr. William C. Diehl, VP of Education
National Education Foundation
4926-C Eisenhower Ave.
Alexandria, VA 22304

Dear Dr. Diehl:

The Liberty Central School District has been working with the National Education Foundation (NEF) and the CyberLearning Academy for the past year. I am pleased to report that this has been a worthwhile and productive experience for everyone involved. Dr. Kuttan and his staff have been available, responsive, and supportive in our needs to provide online, differentiated learning opportunities for our students.

The CyberLearning Academy learning management system is a cost-effective K-12 total solution, complete with teacher training, mentoring & motivational support, tech support, and a stipend for the academy director. Our students have been very successful in increasing their scores on the SAT tests as a direct result of using the SAT review program. In addition, our students have benefitted from the IC3 program to increase their scores on the 8th Grade Technology Literacy exam. We have utilized the mathematics program to support and increase the success of our students in our AIS (academic intervention services) program. These are just a few of the successes that Liberty has experienced over the past year.

In addition to the CyberLearning Academy learning management system, NEF has donated 20 Pearson SuccessMaker & NovaNet licenses to the Liberty Central School District. This will allow our students to utilize a highly-acclaimed and successful software program, that they would not otherwise be able to access. On behalf of our superintendent and assistant superintendent we thank Dr. Kuttan and his staff for their unrelenting support. Without their financial, educational, and motivational support we would not be able to provide this caliber of online learning to our students. Thank you and we look forward to another successful year as we begin our 2011-12 academic school year.

Sincerely,

Judy Brink

Judy Brink, Director of Technology &
CyberLearning Academy Director
